

MOVE SOURCE & FONTE

Move is the workstation designed to make your ideas a reality.

8th generation Intel® Core™ processor, graphics Radeon™ RX Vega M VR-Ready, storage SSD M.2 PCIe NVMe, Double storage in Raid, DDR4 memory, ect... Everything was designed to make it a powerful and functional machine without neglecting the aesthetic aspect.

Thanks to an innovative thermal solution, the Move remains extremely quiet even when fully charged and is equipped with graphics card Radeon™ RX Vega M VR-Ready with 4Gb memory, giving you a graphic power capable of meeting the most intense needs, you will be ready for UHD 4K immersion.

Move things up a gear with the performances of the NVMe™ PCIe SSD embedded in the Move and get your system and applications more responsive. The Raid 1 solution embedded in all Move, automates the complete redundancy of your data and is systematically duplicated on both disks and thus, in case of failure of one of the disks, the data is preserved on the second.
