Compact

Ultra-silent

Low consumption

VESA

Multi-screen

4K ULTRA HD

3 years warranty

The Octo, a powerful computer, quiet, ultra-compact and especially multi-business.

Ideal for workstations, point-of-sale applications, meeting rooms and digital signage.

Equipped with the latest technologies in microprocessors, memories and SSD storage, the Octo is a great computer with outstanding performance for office, management, financial and multimedia applications.

Embedded NVMe PCIe SSD storage, 4K UHD, multiple input / output ports, dual-core and quad-core processors, solid hardware to meet the most tough business requirements.

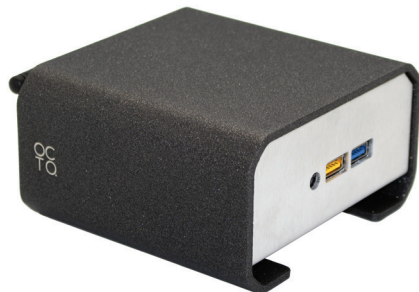

Compatible with VESA, the Octo can be easily installed at the back of a screen.

And if you already use the VESA mounting holes, such as, for example, with a screen with adjustable feet ... nothing could be more simple than with the VESA support extension option.
