Based on Intel®'s brand new Modular Computing Systems NUC Elements, META^U meets the needs of applications in different IT sectors such as IoT, Embedded Computing, industry or Digital Signage.

Thanks to its design and compatibility with Intel® NUC Elements Technology, upgrading META^U to future technologies will be very simple.

Manufactured from raw aluminium, META^U has a fanless chassis which is optimised for efficient cooling and durability in harsh environments.

Available on some META^U, Intel® vPro™ Technology makes it possible to monitor, troubleshoot and protect its infrastructure.
