BY BLEU JOUR

A modern keyboard with trendy colors

Its extra-thin keys ensure you a tipping comfort that has never been experienced before with a low sound level, it will enable you to work in perfect conditions.

Designed and conceived on the same branch as Kubb, the CTRL keyboard is available in several colors (grainy paint) or in aluminium.

Connect multiple devices

To choose : Bluetooth®, USB or both ?

If you want to work in wireless mode thanks to Bluetooth® you have to pair your keyboard with one of your peripheral devices, it's as simple as that !

You are... rather wired, connect your CTRL keyboard to the USB port of your computer and this one will run on USB mode while

offering you the opportunity to pair other devices in Bluetooth®.

∨ USE

Universal and multi-device

Windows®, Mac, Android™, iOS (iPhone and iPad), Linux or Chrome, whatever your system is, you will be able to easily pair up to 3 peripheral devices and switch from one device to another in order to write a report on your computer then reply to a message on your tablet or smartphone and this by pressing one of the dedicated keys.
