The Octo N4000 is an ultra-compact and fanless solution equipped with Intel® Celeron® Dual-Core processor.

Ideal for workstations, thin client, point-of-sale applications or meeting rooms, the Octo will meet the requirements of small businesses, small and medium-sized businesses or even education.

The Octo N4000 didn't lack of resources in terms of wired or wireless connectivity.

With wired connection, we have 4 USB ports including 1 Type-C, an Ethernet Gigabit connector, 2 HDMI output, 1 COM port as well as an audio port.

For the wireless connection, this one is assured by a WiFi AC 3168 and Bluetooth 4.2.

INSTALLATION & OPTION

CUSTOMIZATION OPTION

Be different !

Thanks to our customization option, you can print your Kubb with your logo.

L'Octo N-4000 becomes an unique and corporate computer.

 VESA SUPPORT

Compatible with VESA, the Octo N-4000 can be easily installed at the back of a screen.

And if you already use the VESA mounting holes, such as, for example, with a screen with adjustable feet… nothing could be more simple than with the VESA support extension option.
